

Government of the District of Columbia

Department of Transportation

d. Infrastructure Project Management Division

Wednesday, May 15, 2019

Dear Resident/ANC/Local Businesses/Property Managers:

The District Department of Transportation (DDOT) will begin a construction of permeable pavement for parking lanes at the 3300 block of 11th Street NW as part of the LeDroit Park Green Infrastructure Project (see map on the reverse side of this sheet). The permeable pavement is a more environmentally friendly method to control runoff. This work is anticipated to start on or after June 10, 2019, and take approximately 7 weeks to complete, weather permitting.

If weather conditions, schedule changes, or unforeseen issues do not permit our contractor to begin this work on the date stated above, the new start date for construction will be listed on the “EMERGENCY NO PARKING” signs posted on the poles and trees throughout the construction project site.

Throughout the construction area, at least one lane of traffic will be open per direction. Access to the adjacent houses will also be maintained. Curbside parking will be restricted around this location during construction hours. “EMERGENCY NO PARKING” signs will be posted seventy-two (72) hours prior to the commencement of construction in your area. These signs will be installed in the shown work area and any staging area needed in adjacent streets.

All work will be conducted from 7:00 am to 7:00 pm, Monday through Saturday.

DDOT thanks you in advance for your patience and understanding during the construction; if you have any questions or concerns, please contact me by phone or email, listed below.

Sincerely,

Morvarid Ganjalizadeh
Project Manager
